**A Cultural History of Education in the Age of Enlightenment** Daniel Tröhler 2020 "'A Cultural History of Education' is the first comprehensive and interdisciplinary overview of the cultural history of education from ancient times to the present day. With six illustrated volumes covering 2800 years of human history, this is the definitive reference work on the subject. Each volume adopts the same thematic structure, covering: church, religion and morality; knowledge, media and communications; children and childhood; family, community and sociability; learners and learning; teachers and teaching; literacies; life-histories. This enables readers to trace one theme throughout history, as well as providing them with a thorough overview of each individual period" --

**Chance Or Purpose?** Christoph Schonborn 2007-01-01 Cardinal Christoph Schonborn's article on evolution and creation in The New York Times launched an international controversy. Critics charged him with biblical literalism and "creationism." In this book, Cardinal Schonborn responds to his critics by tackling the hard questions with a carefully reasoned "theology of creation." Can we still speak intelligently of the world as "creation" and affirm the existence of the Creator, or is God a "delusion"? How should an informed believer read Genesis? If God exists, why is there so much injustice and suffering? Are human beings a part of nature or elevated above it? What is man's destiny? Is everything a matter of chance or can we discern purpose in human existence? In his treatment of evolution, Cardinal Schonborn distinguishes the biological theory from "evolutionism," the ideology that tries to reduce all of reality to mindless, meaningless processes. He argues that science and a rationally grounded faith are not at odds and that what many people represent as "science" is really a set of philosophical positions that will not withstand critical scrutiny. Chance or Purpose? directly raises the philosophical and theological issues many scientists today overlook or ignore. The result is a vigorous, frank dialogue that acknowledges the respective insights of the philosopher, the theologian and the scientist, but which calls on them to listen and to learn from each another.

**Breath** Antonia Pozzi 2002-10 Rediscovery of a stunning achievement in modern Italian poetry. At the start of a promising career, Antonia Pozzi (1912-1938) committed suicide, leaving behind several hundred poems known only to her closest friends. The posthumous publication of this work led Eugenio Montale to praise Pozzi's "desire to reduce the weight of words to the minimum." Her Modernist verse is lyrical and experimental, pastoral and erotic, powerfully evoking the northern Italian landscape and her personal tragedies amid the repressive climate of Fascism. Breath contains a representative selection of Pozzi's poems in an Italian/ English bilingual format along with a number of her letters. In an introductory essay, editor-translator Lawrence Venuti documents her tormented life, considers her sophisticated thinking about her writing, and sketches the rich literary traditions that she inherited, creating a detailed context in which her poems can be more fully appreciated. The translations

affiliate Pozzi's poetry with the work of comparable English-language writers such as H.D., Mina Loy, and Lorine Niedecker, establishing in translation what Pozzi lacked in Italian: a tradition of Modernist women's poetries.

**America and the Great War** D. Clayton James 2014-09-12 In America and the Great War, 1914-1920, the accomplished writing team of D. Clayton James and Anne Sharp Wells provides a succinct account of the principal military, political, and social developments in United States History as the nation responded to, and was changed by, a world in crisis. A forthright examination of America's unprecedented military commitment and actions abroad, America and the Great War includes insights into the personalities of key Allied officers and civilian leaders as well as the evolution of the new American "citizen soldier." Full coverage is given to President Wilson's beleaguered second term, the experience of Americans-including women, minorities, and recent arrivals-on the home front, and the lasting changes left in the Great War's wake.

**Arts & Humanities Citation Index** 1987 A multidisciplinary index covering the journal literature of the arts and humanities. It fully covers 1,144 of the world's leading arts and humanities journals, and it indexes individually selected, relevant items from over 6,800 major science and social science journals.

**Prester John, the Mongols, and the Ten Lost Tribes** Charles Fraser Beckingham 1996 This study makes an important contribution to the study of the Prester John legend and will be of interest to a wide range of scholars working in the field of medieval history and literature. The principal sources relating to Prester John are reprinted here for the first time in more than a century, together with a number of key modern articles on this topic. In addition, an international group of scholars has contributed six new studies which examine the legend in the context of Mongol history, Russian literature, the medieval Jewish accounts of the Ten Lost Tribes, the crusading movement, and the Portuguese voyages of exploration.

**Catalysis for Sustainability** Thomas P. Umile, Ph.D 2015-08-05 Catalysis for Sustainability: Goals, Challenges, and Impacts explores the intersection between catalytic science and sustainable technologies as a means to addressing current economic, social, and environmental problems. These problems include harnessing alternative energy sources, pollution prevention and remediation, and the manufacturing of commodity products. The book describes the nature of catalysis regarding sustainability and presents challenges to accomplishing sustainability as well as the significance of proven or potential success. The contributors have backgrounds in academia and industry to create a more integrated picture of the issues involving sustainability and catalysis. Broad in scope, the book covers topics such as traditional metal-mediated catalysis, organocatalysis, biocatalysis, biomimicry, and heterogeneous catalysis. It includes chapters dedicated to specific research areas of catalysis as they pertain to their effectiveness, their economic and environmental benefits, and the challenges researchers face in actualizing solutions. It also contains a

chapter on the application of life cycle analysis to catalytic processes, demonstrating the need to holistically consider the sustainable impacts of a process. The book can be read in a straightforward fashion or skimmed without forfeiting understanding of the narrative on the strategies and intentions of research and development.

Throughout the book the requirements of sustainability are measured by the triple bottom line of environmental, economic, and social impacts. It highlights real-world implementations of catalytic processes in drug development, manufacturing, polymers, and energy. *Catalysis for Sustainability: Goals, Challenges, and Impacts* is a strong and versatile text. It provides an introduction to the field and the issues with which it is concerned, as well as a detailed and far-reaching discussion on current achievements and future progress.

*Paranoid Transformer* Aleksey Tikhonov 2020-08-18 The diary of Paranoid Transformer is the output of interactions between a series of neural networks. Mysterious, humorous, dark and sometimes intelligible, Paranoid Transformer points to new frontiers to "not only what can be achieved aesthetically by the plethora of contemporary deep learning techniques, but also the scope for human creativity in harnessing these AI tools for advancing the arts." -- Luba Elliott.

*Business Elites and Corporate Governance in France and the UK* M. Maclean 2005-12-09 *Business Elites and Corporate Governance in France and the UK* is a cross-national study of business elites and corporate governance in France and the UK. It examines corporate governance from a comparative standpoint and looks beneath the surface at the exercise of power and authority in two distinct national business systems. It explores key issues concerning business elites, their networks, recruitment and reproduction. It aims to shed light on the mechanisms that govern the stability and regeneration of business elites against the backdrop of an increasingly global economy.

**Street Art, Public City** Alison Young 2013-11-20 What is street art? Who is the street artist? Why is street art a crime? Since the late 1990s, a distinctive cultural practice has emerged in many cities: street art, involving the placement of uncommissioned artworks in public places. Sometimes regarded as a variant of graffiti, sometimes called a new art movement, its practitioners engage in illicit activities while at the same time the resulting artworks can command high prices at auction and have become collectable aesthetic commodities. Such paradoxical responses show that street art challenges conventional understandings of culture, law, crime and art. *Street Art, Public City: Law, Crime and the Urban Imagination* engages with those paradoxes in order to understand how street art reveals new modes of citizenship in the contemporary city. It examines the histories of street art and the motivations of street artists, and the experiences both of making street art and looking at street art in public space. It considers the ways in which street art has become an integral part of the identity of cities such as London, New York, Berlin, and Melbourne, at the same time as street art has become increasingly criminalised. It investigates the implications of street art for conceptions of property and authority, and suggests that street art and the urban imagination can point us towards a different kind of city: the public city. *Street Art, Public City* will be of interest to readers concerned with art, culture, law, cities and urban space, and also to readers in the fields of legal studies, cultural criminology, urban geography, cultural studies and art more generally.

**Czech Lands, Part 1** Lucie Storchová 2020-09-07 "Companion to Central and East European Humanism: Czech Lands" is the first reference work on humanists and their literary activities in this region which appears in English. In two volumes, it offers biographical and bibliographical data about humanist literary life between ca.

1480 and 1630. Apart from introductory chapters, the first volume includes more than 150 biographical entries dealing with authors whose names begin with letters A-L as well as complete overviews of the most recent research on humanism in Central Europe. The interdisciplinary research team paid special attention to local approaches to classical tradition, to forms of humanistic polylingualism and to participation of Bohemian authors in European scholarly networks. Both volumes are of high relevance for all academics who are interested in humanism and history of early modern literature in Central Europe.

*Dictionary of Languages* Andrew Dalby 2015-10-28 Covering the political, social and historical background of each language, *Dictionary of Languages* offers a unique insight into human culture and communication. Every language with official status is included, as well as all those that have a written literature and 175 'minor' languages with special historical or anthropological interest. We see how, with the rapidly increasing uniformity of our culture as media's influence spreads, more languages have become extinct or are under threat of extinction. The text is highlighted by maps and charts of scripts, while proverbs, anecdotes and quotations reveal the features that make a language unique.

*Minor Mlabri* Jørgen Rischel 1995 The language described in this monograph is spoken by a small hilltribe in Northern Indochina. Its existence has attracted considerable attention because of the legendary and intriguing primitiveness of the Mlabri or 'Spirits of the Yellow Leaves', as they are traditionally called, but reliable information about the cultural heritage and particularly the language is sparse. This is true in particular of an ethnic subgroup whose culture and language are now close to extinction: the group is referred to as the 'Minor Mlabri'. This monograph is based on field notes from 1988 and later years in which the author visited the 'Minor-Mlabri'. The Mlabri are traditionally hunter-gatherers and seem to have been so for a long time. Until recently this was more or less the lifestyle of the small group under study here. They now associate with Hmongs in remote villages because they were for several years trapped in the war zone between Laos and Thailand and the few survivors of the 'Minor-Mlabri' had to settle down in safer environments. Deforestation has made it increasingly difficult for them to live their traditional life in the area where they belong. Up to now, the Mlabri language (in all its varieties) has been unknown.

*Cancer Epidemiology* Isabel dos Santos Silva 1999 A basic textbook addressed to medical and public health students, clinicians, health professionals, and all others seeking to understand the principles and methods used in cancer epidemiology. Written by a prominent epidemiologist and experienced teacher at the London School of Hygiene

and Tropical Medicine, the text aims to help readers become competent in the use of basic epidemiological tools and capable of exercising critical judgment when assessing results reported by others. Throughout the text, a lively writing style and numerous illustrative examples, often using real research data, facilitate an easy understanding of basic concepts and methods. Information ranges from an entertaining account of the origins of epidemiology, through advice on how to overcome some of the limitations of survival analysis, to a checklist of questions to ask when considering sources of bias. Although statistical concepts and formulae are presented, the emphasis is consistently on the interpretation of the data rather than on the actual calculations. The text has 18 chapters. The first six introduce the basic principles of epidemiology and statistics. Chapters 7-13 deal in more depth with each of the study designs and interpretation of their findings. Two chapters, concerned with the problems of confounding and study size, cover more complex statistical concepts and are included for advanced study. A chapter on methodological issues in cancer prevention gives examples of epidemiology's contribution to primary prevention, screening and other activities for early detection, and tertiary prevention. The concluding chapters review the role of cancer registries and discuss practical considerations that should be taken into account in the design, planning, and conduct of any type of epidemiological research.

**Reading and Responsibility** Derek Attridge 2010-05-27 What is the importance of deconstruction, and the writing of Jacques Derrida in particular, for literary criticism today? Derek Attridge argues that the challenge of Derrida's work for our understanding of literature and its value has still not been fully met, and in this book, which traces a close engagement with Derrida's writing over two decades and reflects an interest in that work going back a further two decades, shows how that work can illuminate a variety of topics. Chapters include an overview of deconstruction as a critical practice today, discussions of the secret, postcolonialism, ethics, literary criticism, jargon, fiction, and photography, and responses to the theoretical writing of Emmanuel Levinas, Roland Barthes, and J. Hillis Miller. Also included is a discussion of the recent reading of Derrida's philosophy as 'radical atheism', and the book ends with a conversation on deconstruction and place with the theorist and critic Jean-Michel Rabate. Running throughout is a concern with the question of responsibility, as exemplified in Derrida's own readings of literary and philosophical texts: responsibility to the work being read, responsibility to the protocols of rational argument, and responsibility to the reader.

**Language Policy and Linguistic Justice** Michele Gazzola 2018-09-03 Language policies are increasingly

acknowledged as being a necessary component of many decisions taken in the areas of the labor market, education, minority languages, mobility, and social inclusion of migrants. They can affect the democratic control of political organizations, and they can either entrench or reduce inequalities. These are the central topics of this book.

Economists, philosophers, political scientists, and sociolinguists discuss – from an interdisciplinary perspective – the distributive socio-economic effects of language policies, their impact on justice and inequality at the national or international level, as well as the connection between language choices and an inclusive access to public services. The range of social and economic issues raised by linguistic diversity in contemporary societies is large, and this requires new approaches to tackle them. This book provides new input to design better, more efficient, and fair language policies in order to manage linguistic diversity in different areas. Topics covered include: theoretical models of linguistic justice and linguistic disadvantage; the assessment of the socio-economic consequences of language policies; the evaluation of the costs, benefits, and degree of inclusion of language planning measures; the politics of migrants' linguistic integration; as well as multilingualism and economic activities. These topics are discussed in different contexts, including the areas inhabited by linguistic minorities, cities receiving migrants, and supranational organizations.

*High Integrity Software* John Gilbert Presslie Barnes 2003 This book provides an accessible introduction to the SPARK programming language. Updated 'classic' that covers all of the new features of SPARK, including Object Oriented Programming. The only book on the market that covers this important and robust programming language. CD-ROM contains the main SPARK tools and additional manuals giving all the information needed to use SPARK in practice. Technology: The SPARK language is aimed at writing reliable software that combines simplicity and rigour within a practical framework. Because of this, many safety-critical, high integrity systems are developed using SPARK. User Level: Intermediate Audience: Software engineers, programmers, technical leaders, software managers. Engineering companies in fields such as avionics, railroads, medical instrumentation and automobiles. Academics giving MSc courses in Safety Critical Systems Engineering, System Safety Engineering, Software Engineering. Author Biography: John Barnes is a veteran of the computing industry. In 1977 he designed and implemented the RTL/2 programming language and was an original member of the ADA programming language design team. He was founder and MD of Alsys Ltd from 1985 to 1991. Currently self employed, John is the author of 'Programming in ADA' which has sold 150000 copies and been translated into 6 languages.

**Translation and Conflict** Mona Baker 2018-10-25 Translation and Conflict was the first book to demonstrate that translators and interpreters participate in circulating as well as resisting the narratives that create the intellectual and moral environment for violent conflict and social tensions. Drawing on narrative theory and with numerous examples from historical and current contexts of conflict, Mona Baker provides an original and coherent model of analysis that pays equal attention to the circulation of narratives in translation and to questions of dominance and resistance. With a new preface by Sue-Ann Harding, Translation and Conflict is more than ever the essential text for any student or researcher interested in the study of translation and social movements.

**The Spaniards** Americo Castro 2018-06-22 This ambitious book by Américo Castro is not simply a history of the Spanish people or culture. It is an attempt to create an entirely new understanding of Spanish society. The Spaniards examines how the social position, religious affiliation, and beliefs of Christians, Moors, and Jews, together with their feelings of superiority or inferiority, determined the development of Spanish identity and culture. Castro follows how españoles began to form a nation beginning in the thirteenth century and became wholly Spanish in the sixteenth century in a different way and under different circumstances than other peoples of Western Europe. The original material of this book (chapters II through XII) was translated by Willard F. King, and the newly added material (preface, chapters I, XIII, and XIV, and appendix) was translated by Selma

Margaretten. This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1971.

The Latin Civilization Feliks Koneczny 2021-02-02 898 pages. Koneczny never wrote a book on the Latin civilization but he wrote about the civilization in all his works. The present volume is a compilation of texts on the Latin civilization left by Koneczny. The Latin civilization is what is generally referred to as the Western civilization, but Koneczny preferred the term 'Latin' to include areas that were under the Romans, thus excluding Germany. The Latin civilization developed on the basis of Greek philosophy, Roman law and Christian ethic. It allows Church to interfere in state matters. It demands that all walks of life be under the same one and only ethic, the ethic of the Catholic Church, including state policies, which differs it from the Byzantine civilization (including Germany) that does not require states to be ethical. Some Protestant states, e.g. Britain, remained Latin because

*Nada*

they consider ethic important also in state affairs and recognize subsidiarity. In Poland there are four civilizations struggling with each other, the Latin, the Turanian, the Byzantine and the Jewish. Koneczny believes that Poland, and most of Europe and Americas are primarily Latin and speaks for the defence of the Latin civilization against encroachments by others. He is a great propagator of the Latin civilization.
