*Polin: Studies in Polish Jewry Volume 18* 2005-11-29  
Jewish women's exclusion from the public domains of religious and civil life has been reflected in their near absence in the master narratives of the East European Jewish past. As a result, the study of Jewish women in eastern Europe is still in its infancy. The fundamental task of historians to construct women as historical subjects, 'as a focus of inquiry, a subject of the story, an agent of the narrative', has only recently begun. This volume is the first collection of essays devoted to the study of Jewish women's experiences in Eastern Europe. The volume is edited by Paula Hyman of Yale University, a leading figure in

Jewish women's history in the United States, and by ChaeRan Freeze of Brandeis University, author of a prize-winning study on Jewish divorce in nineteenth-century Russia. Their Introduction provides a much-needed historiographic survey that summarizes the major work in the field and highlights the lacunae. Their contributors, following this lead, have attempted to go beyond mere description of what women experienced to explore how gender constructed distinct experiences, identities, and meanings. In seeking to recover lost achievements and voices and place them into a broader analytical framework, this volume is an important first step in the rethinking of east European Jewish history with the aid of new insights gleaned from the research on gender. As in earlier volumes of Polin, substantial space is given, in 'New Views', to recent research in other areas of Polish-Jewish studies, and there is a book review section.

### **Science, Technology, and Medicine in the Modern Japanese Empire**

David G. Wittner 2016-03-22 Science, technology, and medicine all contributed to the emerging modern Japanese empire and conditioned key elements of post-war development. As the only emerging non-Western country that was a colonial power in its own right, Japan utilized these fields not only to define itself as racially different from other Asian countries and thus justify its imperialist activities, but also to position itself within the civilized and enlightened world with the advantages of modern science, technologies, and medicine. This book explores the ways in which scientists, engineers and physicians worked directly and indirectly to support the creation of a new Japanese empire, focussing on the eve of World War I and linking their efforts to later post-war developments. By

claiming status as a modern, internationally-engaged country, the Japanese government was faced with having to control pathogens that might otherwise not have threatened the nation. Through the use of traditional and innovative techniques, this volume shows how the government was able to fulfil the state's responsibility to protect society to varying degrees. The contributors push the field of the history of science, technology and medicine in Japan in new directions, raising questions about the definitions of diseases, the false starts in advancing knowledge, and highlighting the very human nature of fields which, on the surface, seem to non-specialists to be highly rational. Challenging older interpretative tendencies, this book highlights the vigour of the field and the potential for future development. Therefore, it will be of huge interest to students and scholars of Japanese history, Asian history, the history of science and technology and the history of medicine.

**Chinese Stories for Language Learners** Vivian Ling

2021-03-23 The highly anticipated next book in Tuttle's Stories for Language Learners series is here! This book presents 22 classic Chinese proverbs and the traditional tales behind them. The stories are bilingual, with the Chinese and English versions presented on facing pages. Each includes an explanation of how the proverb is used today, cultural notes, vocabulary and discussion questions. Online audio recordings of the tales by native speakers give students a chance to improve their pronunciation and comprehension. Some of the proverbs featured in this collection include: "Painting the Eyes on the Dragon" Based on the story of a famous court painter in 6th century China who painted dragons, this proverb refers to the finishing touches needed to bring a work of art or literature to life. In a discussion, it refers to the final statements used to clinch the argument. "Waiting for Rabbits by a Tree Stump" Based on an ancient folktale about a foolish farmer who sees a rabbit kill itself in front of him by running into a tree stump, then gives up tilling his field to wait for more rabbits by the stump. This saying is applied to people who wait passively for luck to strike again. It also refers to impractical people who stick to one way of doing things only because it has worked for them once in the past. "Pure Water Has No Fish; Perfect People Have No Friends" Many versions of this historical tale exist. The one told here is about a 2nd century AD

official sent to govern a far-flung outpost on the Silk Road who is fastidious in applying strict rules and thereby causes the local people to rebel against him. In the professional world, it is used to refer to people who do not like to work with an overly strict supervisor or colleague. Whether being used in a classroom or for self-study, Chinese Stories for Language Learners provides an educational and entertaining way for intermediate Mandarin learners to expand their vocabulary and understanding of the language.

**Borderlands Biography** Beata Halicka 2021-10 Beata Halicka's masterly narrated biography is the story of an extraordinary man and leading intellectual in the Polish-American community. Z. Anthony Kruszewski was first a Polish scout fighting in World War II against the Nazi occupiers, then Prisoner of War/Displaced Person in Western Europe. He stranded as a penniless immigrant in post-war America and eventually became a world-renowned academic. Kruszewski's almost incredible life stands out from his entire generation. His story is a microcosm of the 20th-century history, covering various theatres and incorporating key events and

individuals. Kruszewski walks a stage very few people have even stood on, both as an eye-witness at the centre of the Second World War, and later as vice-president of the Polish American Congress, and a professor and political scientist at world-class universities in the USA. Not only did he become a pioneer and a leading figure in Borderland Studies, but he is a borderlander in every sense of the word.

*A Biographical Dictionary of Women's Movements and Feminisms* Francisca de Haan 2006-01-10 This Biographical Dictionary describes the lives, works and aspirations of more than 150 women and men who were active in, or part of, women's movements and feminisms in Central, Eastern and South Eastern Europe. Thus, it challenges the widely held belief that there was no historical feminism in this part of Europe. These innovative and often moving biographical portraits not only show that feminists existed here, but also that they were widespread and diverse, and included Romanian princesses, Serbian philosophers and peasants, Latvian and Slovakian novelists, Albanian teachers, Hungarian Christian social workers and activists of the Catholic women's movement, Austrian factory workers, Bulgarian feminist scientists and socialist feminists, Russian radicals, philanthropists, militant suffragists and Bolshevik activists, prominent writers and philosophers of the Ottoman era, as well as Turkish republican leftist political activists and nationalists, internationally recognized Greek feminist leaders, Estonian pharmacologists and science historians, Slovenian 'literary feminists,' Czech avant-garde painters, Ukrainian feminist scholars, Polish and Czech Senate Members, and many more. Their stories together constitute a rich tapestry of feminist activity and

redress a serious imbalance in the historiography of women's movements and feminisms.

*Higher Education and National Identity* Johannes Remy 2000-01-01 This study focuses on the conflicting aims and deeds of the Russian government and the Polish nationally-minded student youth in the situation which emerged after the closure of the universities in Warsaw and Wilno (Vilnius) in 1832. Thousands of Polish students studied in Russian universities, constituting a considerable portion of the student body. They formed conspiracies, student unions and study circles. Their relations with Russian students entailed both enmity and co-operation. The book analyzes the idea of what it meant to be a Polish student in Russia between 1832 and 1863, and reveals secret disagreements between government politicians concerning the Polish question at the universities.

*Policy and Practice Challenges for Equality in Education* Neimann, Theresa 2021-09-10 Well-educated populations are important aspects of any contemporary society, as education increases national and global development and the positive expansion of communities to participate actively in civil matters also increases. Educational equality is based on the principles of administrative competence and fairness of access and distribution of resources, opportunities, and treatment, which ensures success for every person. Ensuring equal access to quality education requires addressing a wide range of persistent inequalities in society and includes a stronger focus on how different forms of inequalities intersect to produce unequal opportunities or outcomes that affect marginalized and vulnerable groups. Policy

and Practice Challenges for Equality in Education takes a multifaceted look at issues of equality and inequality in education as related to policy, practice, resource access, and distribution. As such, this book explores the potential practices in education that serve to mitigate and transform unproductive practices which have left societies scarred by social and educational inequalities. The chapters provide a critical analysis of the manifestations of inequalities in various educational contexts and discerns how broader social inequalities are informed by education-related matters. This book is ideal for sociologists, administrators, instructors, policymakers, data scientists, community leaders, practitioners, stakeholders, researchers, academicians, and students interested in educational equality and the unique challenges being faced worldwide.

*Arab Family Studies* Suad Joseph 2018-07-10 Family remains the most powerful social idiom and one of the most powerful social structures throughout the Arab world. To engender love of nation among its citizens, national movements portray the nation as a family. To motivate loyalty, political leaders frame themselves as fathers, mothers, brothers, or sisters to their clients, parties, or the citizenry. To stimulate production, economic actors evoke the sense of duty and mutual commitment of family obligation. To sanctify their edicts, clerics wrap religion in the moralities of family and family in the moralities of religion. Social and political movements, from the most secular to the most religious, pull on the tender strings of family love to recruit and bind their members to each other. To call someone family is to offer them almost the highest possible intimacy, loyalty, rights, reciprocities, and dignity. In recognizing the significance of the concept of family, this state-of-the-art literature review captures the major theories, methods, and case studies carried out on Arab families over the past century. The book offers a country-by-country critical assessment of the available scholarship on Arab families. Sixteen chapters focus on specific countries or groups of countries; seven chapters offer examinations of the

literature on key topical issues. Joseph's volume provides an indispensable resource to researchers and students, and advances Arab family studies as a critical independent field of scholarship.

*Boundary-Spanning in Organizations* Janice Langan Fox 2013-11-12 In more recent times, the essence of the gatekeeper's role has moved to the 'boundary spanner' - a systems thinker who understands the specific needs and interests of the organization and whose greatest asset is their ability to move across and through the formal and informal features of the modern organization. There are many types of boundaries associated with an organization, for example, horizontal, (function and expertise), vertical (status, hierarchy), geographic, demographic, and stakeholder. Boundaries are "the defining characteristic of organizations and, boundary roles are the link between the environment and the organization" (Aldrich & Herker, 1977) with functions crucial to the effectiveness and success of the

organization. Despite being a critical success factor for an organization, beginning in the 1970s, the term - 'boundary spanning' has had an intermittent research history: there has been no systematic body of research that has evolved over time. This book aims to invigorate, excite, and expand the literature on boundary spanning in a diverse range of disciplines such as sociology, organizational psychology, management, medicine, defence, health, social work, and community services. The book serves as the first collection of reviews on boundary spanning in organizations.

*Encyclopedia of Russian Women's Movements* Norma Noonan Corigliano 2001 A comprehensive resource profiling individuals and organizations associated with Russian women's movements from the early 19th century to the post-Soviet era. Contributions by approximately fifty authors from the United States, Russia, Europe, and

Canada focus upon the struggle of women to change their society and advance their gender interests. Women activists pursued improvement in educational opportunities, fought for suffrage, established journals, and sought to transform women's consciousness and establish women's studies programs and women's crises centers. They were a strong voice against the tsarist regime and the oppression of communism. Their objectives were as diverse as their strategies, which ranged from incremental reform, to terrorism, to the establishment of women's electoral organizations. This volume contains a comprehensive glossary of term and phrases and a chronology to help put events and developments into historical context. Entries are fully cross-referenced and are followed by suggested readings. This book will be of interest to students and scholars of Russian history and politics, women's history and gender studies.
