Collective Memory and European Identity Willfried Spohn 2016-12-05 Is it possible to create a collective European identity? In this volume, leading scholars assess the link between collective identity construction in Europe and the multiple memory discourses that intervene in this construction process. The authors believe that the exposure of national collective memories to an enlarging communicative space within Europe affects the ways in which national memories are framed. Through this perspective, several case studies of East and West European memory discourses are presented. The first part of the volume elaborates how collective memory can be identified in the new Europe. The second part presents case studies on national memories and related collective identities in respect of European integration and its extension to the East. This timely work is the first to investigate collective identity construction on a pan-European scale and will be of interest to academics and postgraduate students of political sociology and European studies.

[The Spaniards](#) Americo Castro 2018-06-22 This ambitious book by Américo Castro is not simply a history of the Spanish people or culture. It is an attempt to create an entirely new understanding of Spanish society. The Spaniards examines how the social position, religious affiliation, and beliefs of Christians, Moors, and Jews, together with their feelings of superiority or inferiority, determined the development of Spanish identity and culture. Castro follows how españoles began to form a nation beginning in the thirteenth century and became wholly Spanish in the sixteenth century in a different way and under different circumstances than other peoples of Western Europe. The original material of this book (chapters II through XII) was translated by Willard F. King, and the newly added material (preface, chapters I, XIII, and XIV, and appendix) was translated by Selma Margaretten. This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1971.

With the Whole Child in Mind Linda Darling-Hammond 2018-10-22 Among the many models of school reform that have emerged in the late 20th and early 21st centuries, one has endured for more than 50 years: the School Development Program (SDP). Established in 1968 by renowned child psychiatrist James P. Comer and the Yale Child Study Center, the SDP is grounded in the belief that successful schooling—particularly for children from disadvantaged backgrounds—must focus on the whole child. With that in mind, the SDP encompasses both academics and social-emotional development, and it is founded on positive and productive relationships among students, teachers, school leaders, and parents. With the Whole Child in Mind describes the SDP's six developmental pathways (cognitive, social, psychological, physical, linguistic, and ethical) and explains how the program's nine key components (in the form of mechanisms, operations, and guiding principles) create a comprehensive approach to educating children for successful outcomes. Firsthand recollections by Comer, school leaders and teachers, and SDP staff members provide an inside look at the challenges and successes that eventually transformed severely underperforming schools into models of excellence. Linda Darling-Hammond, one of the country's foremost experts on K-12 education, and her colleagues argue persuasively for the continuing relevance of the SDP. Far too many schools still operate in a high-pressure environment that emphasizes testing and standardized curricula while ignoring the fundamental importance of personal connections that make a profound difference for students. Fifty years on, the SDP is still just as powerful as ever.

Leonora Elena Poniatowska 2015-03-05 Born in Lancashire as the wealthy heiress to her British father's textiles empire, Leonora Carrington was destined to live the kind of life only known by the moneyed classes. But even from a young age she rebelled against the strict rules of her social class, against her parents and against the hegemony of religion and conservative thought, and broke free to artistic and personal freedom. Today Carrington is recognised as the key female Surrealist painter, and Poniatowska's fiction charms this exceptional character back to life more truthfully than any biography could. For a time Max Ernst's lover in Paris, Carrington rubbed elbows with Salvador Dalí, Marcel Duchamp, Joan Miró, André Breton and Pablo Picasso. When Ernst fled Paris at the outbreak of the Second World War, Carrington had a breakdown and was locked away in a Spanish asylum before escaping to Mexico, where she would work on the paintings which made her name. In the hands of legendary Mexican novelist Elena Poniatowska, Carrington's life becomes a whirlwind tribute to creative struggle and artistic revolution. Translated by Amanda Hopkinson.

[Translation and Conflict](#) Mona Baker 2018-10-25 Translation and Conflict was the first book to demonstrate that translators and interpreters participate in circulating as well as resisting the narratives that create the intellectual and moral environment for violent conflict and social tensions. Drawing on narrative theory and with numerous examples from historical and current contexts of conflict, Mona Baker provides an original and coherent model of analysis that pays equal attention to the circulation of narratives in translation and to questions of dominance and resistance. With a new preface by Sue-Ann Harding, Translation and Conflict is more than ever the essential text for any student or researcher interested in the study of translation and social movements.

Breath Antonia Pozzi 2002-10 Rediscovery of a stunning achievement in modern Italian poetry. At the start

of a promising career, Antonia Pozzi (1912-1938) committed suicide, leaving behind several hundred poems known only to her closest friends. The posthumous publication of this work led Eugenio Montale to praise Pozzi's "desire to reduce the weight of words to the minimum." Her Modernist verse is lyrical and experimental, pastoral and erotic, powerfully evoking the northern Italian landscape and her personal tragedies amid the repressive climate of Fascism. Breath contains a representative selection of Pozzi's poems in an Italian/ English bilingual format along with a number of her letters. In an introductory essay, editor-translator Lawrence Venuti documents her tormented life, considers her sophisticated thinking about her writing, and sketches the rich literary traditions that she inherited, creating a detailed context in which her poems can be more fully appreciated. The translations affiliate Pozzi's poetry with the work of comparable English-language writers such as H.D., Mina Loy, and Lorine Niedecker, establishing in translation what Pozzi lacked in Italian: a tradition of Modernist women's poetries. CONTRIBUTORS: Lawrence Venuti.

[Income Distribution in Historical Perspective](#) Yehojachin Simon Brenner 1991-10-03 In this volume a distinguished team of international contributors consider some of the central long-term issues raised by the problem of income distribution. The Kuznets curve--i.e. the notion that income distribution became increasingly unequal during the period of industrialization, and progressively less unequal during the twentieth century--lies at the center of much of the analysis, and its relevance is discussed in a wide-ranging series of articles covering the British, Belgian, German, Australian, Austrian and American experiences. This volume is the first in many years to take such a broad, comparative approach to income distribution, and makes an important and authoritative contribution to an area of perennial debate.

Being and Time Martin Heidegger 2008-07-22 "What is the meaning of being?" This is the central question of Martin Heidegger's profoundly important work, in which the great philosopher seeks to explain the basic problems of existence. A central influence on later philosophy, literature, art, and criticism—as well as existentialism and much of postmodern thought—Being and Time forever changed the intellectual map of the modern world. As Richard Rorty wrote in the New York Times Book Review, "You cannot read most of the important thinkers of recent times without taking Heidegger's thought into account." This first paperback edition of John Macquarrie and Edward Robinson's definitive translation also features a new foreword by Heidegger scholar Taylor Carman.

[Connecting Histories of Education](#) Barnita Bagchi 2014-03-30 The history of education in the modern world is a history of transnational and cross-cultural influence. This collection explores those influences in (post) colonial and indigenous education across different geographical contexts. The authors emphasize how local actors constructed their own adaptation of colonialism, identity, and autonomy, creating a multi-centric and entangled history of modern education. In both formal as well as informal aspects, they demonstrate that transnational and cross-cultural exchanges in education have been characterized by appropriation, re-contextualization, and hybridization, thereby rejecting traditional notions of colonial education as an export of pre-existing metropolitan educational systems.

[Cyclic and lexical phonology](#) Jerzy Rubach 1984-01-01 The architecture of the human language faculty has been one of the main foci of the linguistic research of the last half century. This branch of linguistics, broadly known as Generative Grammar, is concerned with the formulation of explanatory formal accounts of linguistic phenomena with the ulterior goal of gaining insight into the properties of the 'language organ'. The series comprises high quality monographs and collected volumes that address such issues. The topics in this series range from phonology to semantics, from syntax to information structure, from mathematical linguistics to studies of the lexicon.

[Handbook on the History of Mathematics Education](#) Alexander Karp 2014-01-25 This is the first comprehensive International Handbook on the History of Mathematics Education, covering a wide spectrum of epochs and civilizations, countries and cultures. Until now, much of the research into the rich and varied history of mathematics education has remained inaccessible to the vast majority of scholars, not least because it has been written in the language, and for readers, of an individual country. And yet a historical overview, however brief, has become an indispensable element of nearly every dissertation and scholarly article. This handbook provides, for the first time, a comprehensive and systematic aid for researchers around the world in finding the information they need about historical developments in mathematics education, not only in their own countries, but globally as well. Although written primarily for mathematics educators, this handbook will also be of interest to researchers of the history of education in general, as well as specialists in cultural and even social history.

Babel No More Michael Erard 2012-01-10 A "fascinating" (The Economist) dive into the world of linguistics that is "part travelogue, part science lesson, part intellectual investigation...an entertaining, informative survey of some of the most fascinating polyglots of our time" (The New York Times Book Review). In Babel No More, Michael Erard, "a monolingual with benefits," sets out on a quest to meet language superlearners and make sense of their mental powers. On the way he uncovers the secrets of historical figures like the nineteenth-century Italian cardinal Joseph Mezzofanti, who was said to speak seventy-two languages, as well as those of living language-superlearners such as Alexander Arguelles, a modern-day polyglot who knows dozens of languages and shows Erard the tricks of the trade to give him a dark glimpse into the life of obsessive language acquisition. With his ambitious examination of what language is, where it lives in the brain, and the cultural implications of polyglots' pursuits, Erard explores the upper limits of our ability to learn and use languages and illuminates the intellectual potential in everyone. How do some people escape the curse of Babel—and what might the gods have demanded of them in return?

A Czech Dreambook Ludvík Vaculík 2019-10-01 It's 1979 in Czechoslovakia, ten years into the crushing restoration of repressive communism known as normalization, and Ludvík Vaculík has writer's block. It has been nearly a decade since he wrote his last novel, and even longer since he wrote the 1968 manifesto, "Two Thousand Words," which the Soviet Union used as one of the pretexts for invading Czechoslovakia. On the advice of a friend, Vaculík begins to keep a diary: "a book about things, people and events." Fifty-four weeks later, what Vaculík has written is a unique mixture of diary, dream journal, and outright fiction – an inverted roman à clef in which the author, his family, his mistresses, the secret police and leading figures of the Czech underground play major roles.

Twelve Years a Slave Solomon Northup 101-01-01 "Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Environmental Politics in Southern Europe K. Eder 2012-12-06 `Europe is sometimes credited with a `polis,' but not a `demos'. Political integration and economic globalisation cannot diminish local identity and social memories. This fascinating collection of national case studies shows why there will always be a local `demos' located in ecology, economy, and society. But there will never be a transnational `demos', precisely because locality is the basis for meaningful sustainability. Long may it triumph.' Tim O'Riordan, CSERGE, University of East Anglia 'The book offers a refreshing perspective on the diversity of Europe and at the same time, on the interdependence of the policies, economies, and societies of European countries. Going beyond the dichotomies of `good and bad' and `leaders and laggards' in environmental matters, the authors contribute to a different understanding of the North-South divide in the process of European integration.' Angela Liberatore, European Commission, Directorate General for Research `This is a self-consciously revisionist volume, whose findings are theoretically significant, policy-relevant, and timely. Its insistence on `bringing society back in,' its debunking of the notion of a `Mediterranean syndrome,' its emphasis on developmental `leapfrogging' capacity of late-comers to emerge as leaders in contexts of late modernity, and its systematic attempt to reconceptualize the politics of Europeanization should be carefully listed to students and policy-makers concerned with collective action, Southern Europe, European integration, and environmental politics.'
